WAECO LK-DETECT

Electronic leak detector, R134a/R1234yf

Electronic leak detection systems are capable of finding very small leaks, but with standard models it can be difficult – not to mention time-consuming – to apply the probe correctly in certain sections of the A/C system. This innovative electronic leak detector features a measuring head on a flexible neck, which makes it easier to reach tight corners and gives you the ability to thoroughly check all areas of an A/C system for leaks.

- Reliable leak detector that senses refrigerant concentrations in the ambient air
- Measuring head on flexible neck to reach hard-to-access places and carry out a thorough inspection
- Sensitivity: up to 5 g / year
- Only responds to R134a/R1234yf refrigerant – no interference by other gases (plastic emissions) or air movement

WAECO UV-DETECT

LED blue light UV leak detection flashlight

UV leak detection is a highly reliable technology. It's capable of tracing ultra-fine leaks and is also the only method available for identifying vibration leaks, making it an indispensable tool for checking and maintaining an A/C system. The WAECO AirCon Service range includes complete UV leak detection kits as well as a wide choice of supporting tools and accessories.

-
- Practical and effective tool for UV leak detection
 - Compact, cordless and lightweight design
 - 100,000-hour, high-brightness LEDs
 - Powered by three AA batteries
 - UV glasses also included

WAECO UV-DETECT

LED leak detection kit for R1234yf

UV leak detection is a highly reliable technology. It's capable of tracing ultra-fine leaks and is also the only method available for identifying vibration leaks, making it an indispensable tool for checking and maintaining an A/C system. The WAECO AirCon Service range includes complete UV leak detection kits as well as a wide choice of supporting tools and accessories.

- Complete kit for UV leak detection – includes LED leak detection lamp, 236 ml refill bottle, UV glasses and TRACER® under-hood labels
- Specially designed for R1234yf A/C service units with integrated UV additive management
- Powerful UV LED lamp (50 W, 12 V), with a UV intensity of 5000 µW/cm²
- Contents of one refill bottle sufficient for approx. 24 car applications

WAECO UV-DETECT

-
- Pump for adding TRACER® leak detection additives to the suction side of charged R134a air conditioners – an integral part of the UV leak detection process
 - Accurate dosing via spindle adjustment
 - Integrated non-return valve protects against over-pressure
 - Supplied with low-pressure service hose, quick coupler for R134a A/C systems, two cartridges of additive (14.80 ml each), vent adapter, hand spindle and label with instructions

Hand pump for adding leak detection additives, R134a

UV leak detection is a highly reliable technology. It's capable of tracing ultra-fine leaks and is also the only method available for identifying vibration leaks, making it an indispensable tool for checking and maintaining an A/C system. The WAECO AirCon Service range includes complete UV leak detection kits as well as a wide choice of supporting tools and accessories.

WAECO UV-DETECT

LED violet light UV leak detection lamp OPTI-PRO™ UV

UV leak detection is a highly reliable technology. It's capable of tracing ultra-fine leaks and is also the only method available for identifying vibration leaks, making it an indispensable tool for checking and maintaining an A/C system. The WAECO AirCon Service range includes complete UV leak detection kits as well as a wide choice of supporting tools and accessories.

- Powerful UV lamp for effective leak detection
- An adjustable focus lens, high/low lighting and a strobe light provide added versatility and control
- Can be recharged using the included smart charger
- Fluorescence-enhancing glasses and lanyard also included
- Leaks will glow brightly when paired with one of our TRACERLINE® dyes

WAECO UV-DETECT

LED violet light UV leak detection lamp OPTI-PRO™ PLUS

UV leak detection is a highly reliable technology. It's capable of tracing ultra-fine leaks and is also the only method available for identifying vibration leaks, making it an indispensable tool for checking and maintaining an A/C system. The WAECO AirCon Service range includes complete UV leak detection kits as well as a wide choice of supporting tools and accessories.

- Powerful UV lamp, with a light output comparable to high-intensity 135 W lamps
- Works with all TRACERLINE® universal/ester and PAG A/C dyes
- Can be recharged using the included smart charger
- Provides 4 hours of continuous use between charges
- Fluorescence-enhancing glasses and lanyard also included
